» Axelent X-It Panic lock with cylinder - now with Slam & Shut function

## Axelent X-It Panic lock with cylinder, now with Slam & Shut function

You cannot tell the difference by just looking on the outside. The difference is that before you had to do a deliberate action and turn the key to be able to lock the door. With the new lock you can close the door regardless if the key is inserted or not. *Slam the door and it is shut.*

Axelent X-It is a keyed cylinder lock designed primarily for all our modular mesh panel systems for machine guarding, industrial/warehouse. Thanks to the unique construction and it's simple assembly, the lock can also be used for similar third party products/systems available on the market.

The lock has an unique design that requires no additional lock housing, just add a standard cylinder such as Euro. The lock is robust with a cover in metal to withstand tough conditions, and is tested and approved according to SS-EN 12209:2016. X-It fits for both hinge or sliding doors. The lock is equipped with a mechanical panic / emergency unit. The product is patent pending.

### X-It

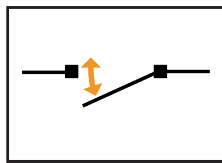

- Robust construction
- Unique locking function
- Convenient
- Flexible, fits for both hinge or sliding door
- Ordered in right or left execution
- Simple assembly
- Tested and approved according to SS-EN 12209:2016
